

ATS Resume Checklist – eteral

ATS-Friendly Format

Use a single-column layout with standard fonts (Arial, Calibri). No tables, text boxes, or columns. Consistent spacing, simple bullet points, and clean section headings.

Contact Details

Include full name, professional email, phone number, city/state, LinkedIn URL, and portfolio link. Ensure all links are active and up to date.

Tailored Keywords

Mirror keywords from the job description in your resume. Include role-specific skills, tools, and terminology to pass ATS filters and catch recruiter attention.

Achievement-Focused Bullet Points

Lead each bullet with a strong action verb. Quantify results where possible (e.g., "Increased sales by 30%"). Focus on impact, not just duties.

Chronological Work Experience

List roles in reverse chronological order. Include company name, job title, location, and dates (Month/Year). Keep entries relevant to the target role.

Skills & Education

List hard and soft skills relevant to the job. Include degrees, institutions, graduation years, and certifications with issuing body and expiry date if applicable.

File & Formatting Checks

Save as PDF only if requested, otherwise follow application instructions. Use a standard filename (FirstName_LastName_Resume). Ensure text is selectable, not image-based.

Final Review

Proofread for spelling, grammar, and date accuracy. Check alignment, spacing, and active links. Verify keyword match with the job posting. Test by copying text into a plain text editor.
